

# Chouaib BENTABET

Entrepreneur | CEO & Founder of Netnook

+212 601 381 005   bentabet.chouaib25@gmail.com   Morocco / Salé

## Education

### Bachelor's Degree in Mathematical and Computer Sciences | Mohammed V

University of Rabat

(2020 - 2024)

- Specialization in advanced algorithms, artificial intelligence, and computer security.
- Academic projects in software development, data analysis, and mathematical modeling.
- Active participation in university research and innovation activities.
- Involvement in the university entrepreneurial ecosystem via student entrepreneur status.

### Baccalaureate in Mathematical Sciences | Mohammed Jamal Dorra High School, Salé

(2020)

- Obtained with honors, specialization in mathematics and physical sciences.
- Participation in scientific and technological competitions.
- Early development of skills in programming and complex problem-solving.

## Professional Experience

### Founder & CEO | Netnook

(2024 - Present)

- Supporting clients and startups in designing their digital strategies.
- Creating and managing a company specialized in digitalization, AI, and cybersecurity.
- Developing web & mobile solutions, process automation, and digital transformation.

- Implementing AI-powered platforms for data analysis and business process automation.
- Conducting cybersecurity audits and implementing data protection protocols compliant with international standards.
- Managing client relationships and developing strategic partnerships with key players in the digital ecosystem.

#### **Technical Support Lead | ECOP Morocco (2023 - Present)**

- Developing and maintaining digital platforms dedicated to ocean professionals, facilitating collaboration and knowledge sharing.
- Designing secure infrastructures for accessing and disseminating ocean and environmental knowledge.
- Providing strategic advice on integrating digital technologies into marine conservation and ocean sustainability projects.
- Training network members on cybersecurity, data protection, and effective use of digital tools.

#### **Full-Stack Developer & Programming | Freelance (2020 - Present)**

- Designing and developing custom web platforms and mobile applications for various clients and industries.
- Integrating AI & Machine Learning solutions for data analysis and process automation.
- Implementing robust security measures and data protection protocols compliant with regulations.
- Optimizing performance and user experience to ensure fast and efficient applications.

#### **Mentor & Trainer in Cybersecurity and Digitalization | Freelance (2023 - Present)**

- Training young entrepreneurs on digital risks, cybersecurity, and business digitalization.
- Organizing bootcamps and hackathons to encourage technological entrepreneurship and innovation.
- Providing personalized mentoring to young innovators, particularly in disadvantaged regions, on developing digital projects.

- Facilitating workshops on technological ethics, digital inclusion, and responsible innovation.

#### Student Entrepreneur | Mohammed V University (2022 - 2024)

- Obtaining official student entrepreneur status, allowing reconciliation of studies and entrepreneurial project development.
- Actively participating in support and mentoring programs offered by the entrepreneurship center.
- Accessing a network of experts, investors, and entrepreneurs for developing innovative projects.
- Benefiting from a structured framework for developing entrepreneurial skills alongside the academic curriculum.

## Innovative Projects & Competitions

---

### SolarAgroBot

Innovative solar-powered robotic solution for smart agriculture, integrating cutting-edge technologies to revolutionize traditional farming practices and promote sustainability.

- **Technologies used:** Artificial Intelligence, Internet of Things (IoT), predictive precision agriculture models, environmental sensors, automation systems.
- **Key features:** Irrigation optimization based on real-time analysis of soil and weather conditions, early detection of plant diseases, personalized recommendations to maximize yields.
- **Environmental impact:** Significant reduction in water consumption, decreased use of pesticides, optimization of energy resources through solar power.
- **Competitions and events:** AgriYoungInnovate (2nd edition), ICAMES, One Young World Summit, FinTech Hackathon V2.0, AgriFood Tech, UM5 Startupeur Challenge.
- **Incubation programs:** Mitsandbox Explorer, AgriEdge.

## Programs & Incubations

---

- Mitsandbox Explorer - Incubation program for innovative startups

- AgriEdge - AgriTech project accelerator
- UM5 Startupeur Challenge - University entrepreneurship competition
- AgriYoungInnovate - 2nd edition - Agricultural innovation competition
- AgriFood Tech - Program for developing technological solutions for agriculture

## Skills

---

- **Development:** JavaScript/React/Node.js, Python/Django, HTML5/CSS3, Mobile Development
- **AI & Data:** Machine Learning, Data Analysis, Automation, Predictive Models
- **Cybersecurity:** Security Audit, Data Protection, Application Security, Regulatory Compliance
- **Personal Skills:** Leadership & Project Management, Technical Communication, Mentoring & Training, Innovation & Creativity

## Languages & Certifications

---

- **Languages:** Arabic (Native), French (Fluent), English (Professional)
- **Certifications:** Artificial Intelligence, Machine Learning, UI/UX Design, Cybersecurity, Full-Stack Web Development

## Commitments & Values

---

- **Enactus:** Active participation in the social entrepreneurship network, mentoring impact projects, and contributing to sustainable development initiatives.
- **STARTGATE at UM6P:** Collaboration with the incubator of Mohammed VI Polytechnic University for the development of the Moroccan entrepreneurial ecosystem.
- **Climate Fresk:** Involvement in raising awareness about climate issues and promoting sustainable technological solutions.
- **Values:** Ethical Innovation, Digital Inclusion, Environmental Sustainability, Social Equity, Knowledge Transfer. Committed to technologies that serve people and the

planet, I firmly believe that digital innovation can be a powerful lever for positive transformation for societies, particularly in Morocco and the Global South.
